

REMARKS

The present RCE Amendment incorporates the recitations of original claim 4 into independent claim 11.

In the Examiner's Answer that was mailed on April 30, 2002, the

Examiner alleges in lines 1-2 on page 4 that "The fatty acids claimed in claim 4 are naturally present in soybean oil". However, Applicants maintain that the

fatty acids in question are those of the meat products of the present invention.

See the specification, page 6, lines 18-23 and page 13, lines 4-8. It is

respectfully submitted that the invention to which the present claims are

directed are patentable over the prior art of record.

Should there be any questions concerning this application, the Examiner

is invited to contact Mr. Richard J. Gallagher, Registration No. 28,781 at (703)

205-8000 in the Washington, D.C. area.

If necessary, the Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit

Application No. 08/952,475

Account No. 02-2448 for any additional fees required under 37 C.F.R. §§1.16 or 1.17; particularly, extension of time fees.
